Cyclone

Quick • Clear • Consistent

The premium microphone windshield system with ground-breaking advancements for all-round performance excellence.

Key Features

- **Superb acoustic transparency** - the open shell structure with no parallel surfaces greatly reduces room-tone effects & provides a clean frequency response;
- **Massive wind noise reduction** - asymmetric basket covered with 3D-TEX® material provides enormous benefits in terms of surface turbulence & acoustic impedance. An optional Cyclone Windjammer can be used for the most extreme weather conditions;
- **Advanced shock isolation** - with industry-leading Rycote Lyre® microphone suspension and exclusive Floating Basket Suspension (Pat. Pending) with built-in Lyre technology, for additional vibration isolation between basket and pole;
- **Quick & Easy** - unique Z-Locking System with magnetic locking for instant windshield removal/attachment;
- **Lightweight, durable construction & materials** - to withstand extreme field use.

*Re Sennheiser MKH 8000 Series microphones: Our recommendation for the Sennheiser MKH8040/8050 is the Cyclone Small (**XLR**) model, based on the use of the Sennheiser MZX (XLR module) with these microphones. If you wish to use either of these mics without the MZX module attached, you can do so using the Cyclone Small (**MZL**).
